

This document introduces Tech2Win, a PC program that executes Tech2 software on a Windows PC.

Almost all vehicle systems supported by Tech2 will also work with the Tech2Win. The same software downloaded and executed on Tech2 will also run on Tech2Win. For that reason, the TIS2Web communication procedures used for Tech2 are also applicable for Tech2Win.

Tech2Win allows you to store as many configurations as you wish. A configuration defines how Tech2Win is to be used. Each configuration may use its own PCMCIA card file or MDI serial number. To learn more about Tech2Win please consult the help that comes with Tech2Win.
