Bringing our ASE-Certified Support Technician to you!

How does it work? It's simple!

Plug-in the kit,

After you've finished your electronic part replacement or repair, it's time to finish the job with **RAP® Flash**. Everything you need is packed in an easy to use, all-in-one kit. There's no need to purchase additional tools, OEM subscriptions, or even have the expertise to get the job done.

Give us a call,

After you've set up the kit, call our toll-free number to get started and connect with one of our world renowned, ASE Certified, RAP Support experts.

We flash the car!

Our RAP Support experts will do the required J2534 programming so you don't have to. Once the job is done, just pack the RAP kit back up for next time. You only pay for each service and success is guaranteed!

Features & Benefits

All-in-one kit

Remote Assist Programming (RAP®) combines our compact, self-contained hardware kit with access to our expert remote diagnostic support team. This allows any independent repair or collision shop to utilize a cost-effective, in-shop solution for updating software in an automobile's computer system(s) during service and/or when replacing parts.

Design

The **RAP®** system, developed by Drew Technologies, was designed as a true turn-key remote solution that can be used by any technician/shop, regardless of experience. The contents of our **RAP® Kit** include a Windows tablet, J2534 device, internet access modem, battery maintainer, OEM subscriptions, and a remote interface directly to our RAP Support experts.

Success is guaranteed!

Drew Technologies guarantees success. Enjoy the peace of mind and customer satisfaction, knowing the vehicle has been successfully repaired *and* programmed!

Experts in J2534

RAP® leverages success from other Drew Technologies J2534 products and its industry leading technical support team, all while incorporating over a decade's worth of intellectual property with several patent(s) pending.
